In addition to the existing modes of authentication towards filing on the portal i.e. DSC and EVC, a new mode of authentication for filing of Form GST CMP-08 using **Single Use Time-Based Authentication Key (STAK)** has been implemented on the portal. The taxpayers need to install "GST Secure OTP" app on their android device. This enables the taxpayers, other than companies and LLP, to generate a token on their mobile and use the same while filing Form GST CMP – 08 on the GST web portal.
