   *Note: Please give consent for the device to **Allow e-Invoice_Verifier to take pictures and record video***

5. Which details will get after scanning the QR code?

On successful scanning of QR code, the below details will be displayed:

- Supplier GSTIN
- Recipient GSTIN
- Document Number
- Document Type
- Document Date
- Total Invoice Value
- No. of Line Items
- Main HSN Code

- IRN

- IRN Generation Date

- Issued By

6. What types of e-Invoices can be verified using the Mobile app?

The app can verify e-Invoices that have embedded QR codes signed by IRPs conforming to the e-Invoicing standards as per the GST Act and Rules.

7. What should I do if I suspect an e-Invoice to be fraudulent even after successful QR code verification?

If the user has reasons to believe that an e-Invoice may be fraudulent or suspicious, it is recommended to check the authenticity of the same by using the Search IRNs functionality hosted at http://einvoice.gst.gov.in under Services > Search IRNs.

8. What happens if the QR code on an e-Invoice cannot be scanned or is unreadable?

If the QR code on an e-Invoice cannot be scanned or is unreadable, the app will display an error message indicating the issue. In such cases, it is recommended to ensure that the QR code is clear and properly aligned within the scanning frame. If the problem persists, contact the e-Invoice issuer or relevant authorities for assistance.

9. Can the app be used to verify the authenticity of physical invoices or receipts?

No, the e-Invoice QR Code Verifier app is specifically designed to verify the authenticity of e-Invoices that contain signed QR codes. It does not support the verification of physical invoices or receipts that do not have embedded QR codes.

10. Is there a limit to the number of e-Invoices I can verify using the Mobile app?

There is no inherent limit to the number of e-Invoices user can verify using the app. User can use the app to verify as many e-Invoices as needed, provided they have QR codes that can be scanned by the app.

11. Can the e-Invoice QR Code Verifier Mobile app be used offline?

Yes, the app can be used offline for QR code verification. It does not require an active internet connection to perform the verification process. However, if user want to access the user guide, the app, or receive support an internet connection is required.

12. Is the app compatible with all the smartphones and tablets?

The app is designed to be compatible with a wide range of smartphones and tablets running on Android and iOS platforms. However, it is recommended to check the system requirements and

compatibility information provided on the respective app stores to ensure that your device meets the necessary specifications.
